

## **CAHUENGA PASS STREETScape PLAN**

The Ventura-Cahuenga Boulevard Corridor Specific Plan allows for design and planting guidelines for the street. These guidelines are called the Streetscape Plan.

The Streetscape Plan for the Cahuenga Pass and Studio City portions of Cahuenga Blvd West and Ventura Boulevard are meant to be a design guide that identifies the specific types of plantings and hardscape features that are desired by these neighborhoods, as well as help direct the street design of adjacent private properties.

Our portion of the Streetscape Plan was primarily written by CPPOA Board Member Florence Blecher, who is an architect with a specialty in landscape design. It is meant to help define and express the character of the individual neighborhoods while still creating a unified design throughout the entire length of the boulevard.
